- Register for a workshop or conference.

02

Skill Gap Assessment

Honest Evaluation of Your Development Needs

List your vision requirements:

What skills does your calling actually require?

Identify your top 3 gaps:

Where are you most deficient?

Rate your current level:

1-10 in each required skill area.

Research solutions:

What training, mentoring, or practice would help?

Create timeline:

When will you address each gap?

Be honest: Overestimating your skills delays your development.
